

# GALVEZ BUILDING

BATON ROUGE, LOUISIANA

The Galvez Building is one of the office buildings built as part of the Capitol Park Master Plan. It is a 12-story, 350,000-square-foot facility that houses several state agencies. United Restoration was contracted to perform window perimeter sealant replacements, wet glazing at specific locations, precast façade cleaning, façade water repellent application, pedestrian traffic coating at balcony, and installation of balcony awning. The scope of work also included excavation of the basement perimeter, installation of bentonite waterproofing, and reinstallation of sprinkler systems and landscaping.
