

KERMIT COURVILLE STADIUM

GALVESTON, TEXAS

Built in 1948, the Ball High school's stadium is named in honor of the late Kermit Courville, the district's first Black athletic director who won five state championships with Ball High's track team before his passing in 1992. After the city had voted to build a new facility, United worked with the design team to provide an equal product while renovating the existing stadium. This allowed the school to keep the concrete structure stadium, cordially known as "The Rock"! United completed structural column and raker beam concrete repairs, surface spall repairs, full depth tread and riser repairs, followed by a new traffic coating system with a multi-colored design. The renovated stadium has been heralded by many as a standout in the community.
