

LIONS BRIDGE - GRANT PARK

ATLANTA, GEORGIA

The Lion Bridge at Atlanta's Grant Park had been a carriage and pedestrian entrance since about 1886. But years of erosion had left the foundation severely compromised and the distinctive lion head features had crumbled beyond repair. With painstaking care, United Restoration disassembled the north wall, stone by stone to allow for repairs to the foundation. Helical piers and a new foundation replaced the existing failed foundation. The stone walls were then rebuilt, placing each stone in the exact location as previously built. A cast was created to craft four lion head replicas and brick pavers were installed between the walls of the bridge to create a picnic patio. The Atlanta Urban Design Commission has recognized The Grant Park Conservancy's Historic Preservation Project with an Award of Excellence.

SERVICES PROVIDED

- Concrete / Structural Restoration
- Historic Restoration
- Masonry Restoration

PROJECT INFO

- Duration 4 Months
- Completed December 2020
- Contract \$ 83,750
- Client The Grant Park Conservancy
- Designer Integrated Land Design
- **Atlanta Urban Design Commission**
Award of Excellence
