

TRINITY UNIVERSITY

SAN ANTONIO, TEXAS

Trinity University's nearly 60-year-old Chapman Center was designed for higher learning but also as a place of beauty and innovation. The Ewing Halsell Center, which originally opened in 1968, was the 41st and last building that famed architect O'Neil Ford designed as part of Trinity's Centennial Program. Both buildings are a part of the 26 buildings on campus that are part of Trinity's National Historic District.

United participated in Trinity University's largest renovation to date, that preserved the midcentury modern architecture of O'Neil Ford, while also bringing new life to these two historic structures. United scope of work included; masonry repairs, repointing, modification and flashing at window openings, concrete repairs, exterior sealants and cleaning of the exterior façade.

SERVICES PROVIDED

- Building Cleaning & Sealing
