Professional Summary

- As Branch Manager, Chris manages all aspects of the branch's operations to include: sales, production, and administration. He also is responsible for the branch's profitability and supervising aspects of quality control. Chris works directly with all URP New Orleans branch employees to manage all relationships with general contractors, subcontractors, building owners, and managers. His oversight extends over all related contract agreements, scheduling, billings, and collections.

Representative Projects

- **JACKSON BARRACKS** - Complete exterior restoration of 14 historic residences location on the current National Guard Base in New Orleans. Work entailed 100% repointing, replacement of over 40,000 bricks, and façade cleaning. Work was performed per guidelines administered by FEMA/NPS Brief 2/SHPO
Project Value - \$3,077,000
- **STANTON HALL** - In conjunction with a local architect and historical conservationist, United Restoration and Preservation repaired historical lime stucco, repaired structural deficiencies at the cornices and rebuilt the mass masonry parapet. Additionally, URP completed stucco repairs at the grand entrance fluted columns and soffits.
Project Value - \$596,000
- **LUSHER HIGH SCHOOL** - A historical masonry high school, found in the heart of New Orleans's Garden District. Lusher High School suffered from deferred maintenance and structural masonry failures. By providing the owner and architect with a design-build solution, URP was able to present a time and cost saving solution. Repairs included masonry grout injection, tuck-pointing, flashing, still replacement, and window restoration.
Project Value - \$2,800,000
- **DIXIE BREWERY** - Large scale masonry restoration on the iconic former brewery in New Orleans. The work included repointing, window steel header flashings, creation of solid masonry wall openings, façade cleaning, parapet reconstruction, and installation of blast reinforcement steel at exterior walls.
Project Value - \$6,450,000
